FREE TREE PLANTING AVAILABLE

Please make a request for a free tree planting in the empty plot on the sidewalk in front of your building!

The city is obligated to do it. The tree would look nice and help the environment!!

Why Is It Important?

- Besides looking good in front of your building, a tree helps to absorb excess carbon dioxide and improve air quality. This contributes to your local environment and helps combat climate change and save our Earth!

Easy Navigation of the Website for Asking the City to Plant a Tree:

1. **Go to website:**
   https://www.nycgovparks.org/trees/street-tree-planting/request
2. As seen on the site, it is free of cost to you. After you make your request you'll receive an identification number to track its status. A Parks Forester will survey the location, and upon approval a tree will be planted.
3. **Click the big green "Submit a Request" button (or, if you want to request by phone, call 311).**
4. **Make sure "Tree Planting Request" is selected from the list of service options.**
5. **Click the bubble for "I would like to have a tree planted along the street"**
6. **Enter your address and borough. Under Additional Location Details indicate that there is an empty plot by your building, and describe briefly where the plot is.**
7. **Input your contact information if you wish. If you give your email address you will receive updates on the request by email.**

Thank you for helping your property, the neighborhood and the world be healthy and look good!
